### **comdirect relies on tick Trading Software AG for ProTrader: New generation of trading software for active retail traders**

- Platform-independent access thanks to modern browser technology
- User-friendliness, professional trading functions, and maximum reliability
- Customizable white label solution for banks, brokers, and neobrokers

Düsseldorf, July 01, 2025 - Düsseldorf, July 1, 2025 – For more than 20 years, asset managers, online brokers, major international banks, and now also neobrokers have relied on the specialized software from tick Trading Software AG (tick-TS AG) for securities trading and settlement. A new version of the TradeBase MX platform (TBMX) is now available to them. For the first time, the front end for trading is browser-based and does not require any additional software installation. This gives users fast access to a modern trading experience – regardless of their operating system or device.

As a white label solution, the new TBMX version from tick-TS AG is particularly suitable for banks, online brokers, and neobrokers who want to offer their active retail customers a user-friendly platform for securities trading with professional functionalities and maximum reliability, even in particularly dynamic market phases. The white label front end is customized by tick-TS AG in terms of design and functionality to meet the specific requirements of each customer.

comdirect – a brand of Commerzbank AG – is relying on the browser-based TBMX platform from tick-TS AG for the completely redesigned version of ProTrader, the interactive real-time trading interface for the comdirect securities account, which was presented today. In addition to comprehensive market information and trading functions, the new ProTrader also offers intuitive operation with a customizable interface. Functions include real-time charts displaying current purchase prices or limit orders, the option of 1-click trading, watch lists with price alerts, market depth, and news – all self-updating and in real time.

“With the new version of ProTrader, we are offering our customers a powerful trading interface that not only gives them greater flexibility and efficiency in trading, but also offers a wide range of useful functions,” explained Björn Andersen, Head of Brokerage at comdirect.

„Die mehrjährige Entwicklungsarbeit hat sich ausgezahlt. Mit der neuesten Version unseres TBMX-Frontends stellen wir einmal mehr unter Beweis, wie leistungsstark, flexibel und zukunftsorientiert unsere Plattformtechnologie ist. Der ProTrader zeigt, dass wir gemeinsam mit comdirect neue Maßstäbe im Retail-Trading setzen – technologisch und funktional“, erklärt Carsten Schölzki, CEO der tick Trading Software AG. „Wir sind davon überzeugt, weitere Neu- und Bestandskunden von der modernen Technologie und den individuellen Möglichkeiten der TBMX-Plattform überzeugen zu können.“

### **About tick Trading Software AG**

With the TradeBase MX platform (TBMX), tick-TS AG has been successfully providing its professional customers with one of the world's most advanced and reliable trading platforms for more than 20 years. The product portfolio includes direct connections to national and international marketplaces and brokers, market making tools for designated sponsoring, a proprietary hosting and housing infrastructure and the e-Trading Compliance Monitor (ECM) for compliance with ESMA regulations.

tick-TS AG has been listed on the primary market (Regulated Unofficial Market) of the Düsseldorf Stock Exchange since 2017 (ISIN: DE000A35JS99, ticker symbol: TBX0) and is available on many other trading venues. A special feature is the payment of the entire distributable net profit as a dividend to investors, as stipulated in the company's Articles of Association.
